

# WHY I BELIEVE IN MIRACLES

John 20:30-31; John 21:25

## 1. What is a Miracle?

- A miracle is an interference with nature by super-natural power. - C. S. Lewis
- Miracles are events in the external world wrought by the power of God and intended as a sign. They are possible because God sustains, controls, and guides all things and is omnipotent. - Westminster Dictionary of the Bible

## II. Why I Believe that the Miracles in the Bible are True.

- A. I believe in God and if there is a God, there is the possibility and probability of a miracle.
- B. I believe in Jesus and He did miracles.
- C. I believe the Bible and the Bible is full of miracles. John 10:37-38

## III. What Do I Say to Skeptics?

- A. Some skeptics say the so-called "miracles" in the Bible occurred in a prescientific time and can easily be explained by science as natural phenomena.  
Response: Most of the biblical miracles have no natural explanation.
- B. Some skeptics say, "If there really is a God, He needs to send a miracle to me and prove it."  
Response: Even if God did special miracles for unbelievers, that does not guarantee they would believe. Luke 16:25-31

God did send a miracle to prove His existence – Jesus!

- C. Some skeptics say, "I don't believe in miracles because I have never one."  
Response: Just because you have not seen something does not mean it cannot happen.

I believe in miracles because I have seen at least one undeniable miracle.

I believe in miracles because credible people give credible evidence for miracles.

## IV. Do you Need a Miracle?
